SECTION-B (Marks 15)**Q. 2 Give short answers of the following questions. (5×3 = 15)**

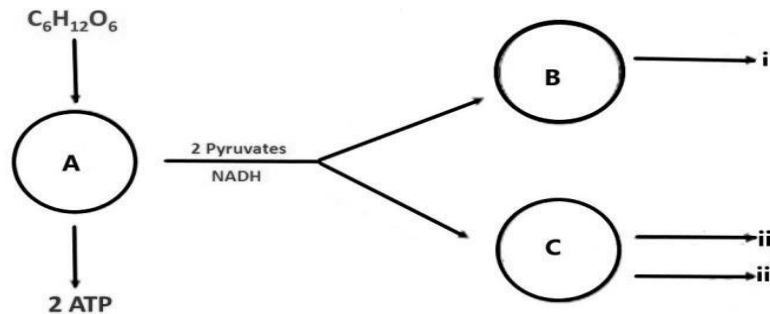

- i. Visualize what safety factor is there in releasing the pepsin in its inactive form?

- ii. Following table shows the names of three enzymes found in alimentary canal. Complete the Table by writing names of substrate and end-product for each enzyme.

Name of enzyme	Substrate	End-product
Protease		
Amylase		
Lipase		

- iii. Differentiate between the cross sectional views of brain and spinal cord with reference to white and grey matter.

- iv. The flow chart is showing anaerobic respiration.

- (a) Identify the processes A, B and C. (1.5)

- (b) Mention the products (i), (ii) and (iii) produced by these processes. (1.5)

- v. Keeping in view the working of vaccine, summarize how does corona vaccine produce immunity in human body.

ATTEMPT ALL QUESTIONS

SECTION-A (Marks 5)

Q. 1 Fill in the blanks. Each blank carries 0.5 marks.

- (1) Alkenes are also known as _____
- (2) The total number of shared electrons in a molecule of CO_2 are _____
- (3) _____ is the process in which speed of the particles decreases.
- (4) An example of heterocyclic compound is _____
- (5) _____ pollutant is not produced by the burning of fossil fuel.
- (6) Stem 'Prop' stands for _____ carbon atoms.
- (7) Period number of ${}_{15}^{31}P$ is _____
- (8) Marble buildings and statues are destroyed by acid rain due to the reaction of sulphuric acid with _____
- (9) _____ is formed by joining two molecules of amino acids.
- (10) F^- is an example of _____

SECTION-B (Marks 15)

Q. 2 Attempt all questions. Each question carries three marks.

(3×5 = 15)

i. Consider the following equilibrium reaction:

Write its K_c expression and also determine its unit?

ii. Complete and balance the following chemical reactions:

iii. Identify the functional group in the following compounds:

iv. Describe ion exchange method for removal of permanent hardness in water.

v. Concentration of an aqueous solution of potassium hydroxide is 1.0×10^{-3} mol/dm³. What is its pH? Is this solution acidic, basic or neutral?

ATTEMPT ALL QUESTIONS

SECTION-A (Marks 5)

Q. 1 Fill in the blanks. Each blank carries 0.5 marks.

- (1) $\log_b m + \log_b n =$ _____
- (2) $\frac{-5}{3} + \frac{7}{2} =$ _____
- (3) A fraction in which the degree of the numerator is greater or equal the degree of denominator is called _____
- (4) A function $f: A \rightarrow B$ is called an _____ function if all distinct elements of A have a distinct images in B.
- (5) A function $f: A \rightarrow B$ is called a _____ function if function f is one-one and onto.
- (6) If $x^2 - 5x + 6 = 0$ then $S.S =$ _____
- (7) Mode is defined as the most _____ occurring observation of the variable or data.
- (8) Area of a circular sector = _____
- (9) $1 + \cot^2 x =$ _____
- (10) Two tangents drawn to a circle from a point outside it, are equal in _____

SECTION-B (Marks 15)

Note: Attempt all questions. Each question carries five marks. (3×5 = 15)

- Q. 2** Two sides of a rectangular field differ by 7 cm. By using Cramer's Rule deduce the dimensions of rectangular field if its perimeter is 134 cm.
- Q. 3** If $x = 3 - \sqrt{10}$, interpret $x - \frac{1}{x}$.
- Q. 4** Interpret the values of x . when $2x + 3 = \sqrt{3x + 7}$
- Q. 5** If $\text{Cosec}x = \frac{13}{12}$ and $\text{Sec}x > 0$, calculate the remaining trigonometric functions.
- Q. 6** A flagpole 18 m high casts a 7 m shadow. Calculate the angle of elevation of the sun.

ATTEMPT ALL QUESTIONS

SECTION-A (Marks 5)

Q. 1 Fill in the blank. Each part carries 0.5 marks.

- (1) The direction of the acceleration of a body moving along a circular path is always _____
- (2) When current carrying conductor is placed in a magnetic field in such a way that it is parallel to the field, then force acting on it is _____
- (3) If the thickness of a wall becomes doubled, what happens to its thermal conductivity _____
- (4) The output of a two-inputs A and B in a NOR gate is '1' when input A is _____ and input B is _____
- (5) The unit of specific resistance is _____
- (6) The process by which electrons are emitted by hot metal filament is called _____
- (7) The variation of focal length to form a sharp image on retina is called _____
- (8) The separation between two lines on the vernier scale is _____
- (9) A car is moving at a speed of 36 km h^{-1} . Its speed in ms^{-1} is _____
- (10) Electron-volt is the unit of _____

SECTION-B (Marks 15)

Q. 2 Give short answers of the following questions. (5×3 = 15)

- i. A cyclist completes half round of a circular track of radius 318 m in 1.5 minutes. Calculate its speed and velocity.

- ii. Sketch a speed-time graph for a body moving with constant speed.

- iii. Why thermister doesn't obey Ohm's law?

- iv. Will two wires carrying current in the same direction attract or repel each other? Give reason

- v. If pitch of sound is decreased in air. What is the effect on wavelength and wave velocity?
